

## Shop Update (1.5.5 to 2.0):

- \* This update will be workable if the installed version is 1.5.5.
- \* Make sure your php version is 7.x
- \* Make sure to back up your script and sql before the updating process.

1. Log in to your cPanel. Open File Manager.
2. Open the folder where your running script is located.
3. Upload the **application.zip, system.zip, templates.zip** file from updates/1.5.5 to 2.0/  
which is downloaded from CodeCanyon to your server where your script is running.
4. Extract the zips one by one file in the root directory of the running script.  
( Example: if yours cript is located in the public\_html/shop in the server.  
Then, public\_html/shop is the root directory.)
5. Go to PhpMyAdmin and open the database of your running script.
6. Make back up of your sql and import the sql file which is provided in the updates/1.5.5 to 2.0/1.5.5\_2.0.sql file.
